

Shortage Occupation List (SOL)
EMPLOYER GUIDE
2024 Edition

Paul Hype Page & Co.

Introduction

From 1 September 2023, new Employment Pass (EP) candidates need to pass the points-based COMPASS in addition to meeting the EP qualifying salary. There are 2 types of criteria to pass COMPASS. They are Foundation Criteria and Bonus Criteria.

Foundation Criteria includes:

1. Salary (relative to local PMET salary norms)
2. Qualifications (based on candidate qualifications)
3. Diversity (whether candidate improves the nationality diversity in firm)
4. Support for Local Employment (based on local PMET share relative to industry peers)

Bonus Criteria includes:

1. Skills bonus Strategic (for candidates in job where skills shortages exist)
2. Economic Priorities bonus (for partnership with government on investment, innovation, transformation activities)

Fair Consideration Framework (FCF)

Under Fair Consideration Framework (FCF), employers must first advertise the job on MyCareersFuture to prove that they promote fair employment practices and have labor market transparency. Duration of advertisement should be at least 14 days before proceeding for an EP application for foreigners.

Checklist for job posting

- Your candidate must be performing the key job duties listed for the specific shortage occupation. If not, the candidate's role is not covered under the shortage occupation.
- You should select one of the eligible job titles in the EP application form. This must be the same as the occupation for the job advertisement in MyCareersFuture (MCF), unless you are exempted from the FCF job advertising requirement.
- Your application must meet the additional requirements specific to the shortage occupation. This can include:
 1. Relevant qualifications, to be uploaded under the qualifications section of the EP application form.
 2. Work experience in relevant job titles, to be selected under the work experience section in the EP application form.
 3. Registration proof, to be uploaded in the agency support question in the EP application form

Details of Shortage Occupations

			bioprocessing to improve product cost and quality		
Financial Services					
3	Financial/ investment adviser (ultra-high/high net worth, family office & philanthropy)	Investment advisor (ultra-high/high net worth / family office / philanthropy)	<ul style="list-style-type: none"> • Serve as strategic advisor on client's overall investment portfolio to drive holistic portfolio construction and asset allocation activities to provide tailored investment proposals, portfolio analysis, review and aftersales services to ultra-high/high net worth or family office clients and relationship managers, including in emerging areas such as philanthropy. • Understand and assess client's overall risk appetite, investment objectives and client suitability. • Educate sales force on product solutions. 	<p>Candidates should meet both criteria (1) and (2):</p> <p>(1) Employer is a Singapore licensed financial institution (FI) with private banking business. MOM verifies this directly with the Monetary Authority of Singapore (MAS), so no additional documentation is required. FIs can reach out to MAS for clarifications.</p> <p>(2) Minimum total three years' work experience in any of these job titles:</p> <ul style="list-style-type: none"> o Investment advisor (ultra-high/ high net worth/ family office/ philanthropy). 	Monetary Authority of Singapore (MAS)
		Relationship manager (ultra-high/high net worth / family office / philanthropy)	<ul style="list-style-type: none"> • Develop keen understanding of ultra-high/high net worth or family office clients' holistic needs, and work with colleagues in investment products and solutions teams to develop and provide bespoke trusted advice and solutions to clients across successive generations and international borders, including in emerging areas of client interest such as 	<p>Candidates should meet both criteria (1) and (2):</p> <p>(1) Employer is a Singapore licensed FI with private banking business. MOM verifies this directly with MAS, so no additional documentation is required. FIs can reach out to MAS for clarifications.</p> <p>(2) Minimum total three years' work experience in any of these job titles:</p> <ul style="list-style-type: none"> o Relationship manager (ultra-high/high net worth / family office / philanthropy). 	MAS

			<p>philanthropy.</p> <ul style="list-style-type: none"> • Build, establish and grow client relationship. • Take a strategic view of clients' investments and closely monitor their portfolio quality. 		
		<p>Wealth planner (ultra-high/high net worth / family office / philanthropy)</p>	<ul style="list-style-type: none"> • Develop bespoke solutions that may involve trust planning, tax and estate planning, family office solutions, and insurance-related needs, as well as emerging areas of client interest such as philanthropy for ultra-high/high net worth or family office clients across successive generations and international borders. • Apply understanding of political, tax and economic developments in specific countries to client situations whilst ensuring that wealth planning business continues to meet the bank's general and wealth planning specific standards and policies. • Support relationship managers in client meetings, structuring, presentations and after-sales activities relating to asset ownership and asset transfer. • Provide wealth planning technical and application training to relationship managers. 	<p>Candidates should meet both criteria (1) and (2):</p> <p>(1) Employer is a Singapore licensed FI with private banking business. MOM verifies this directly with MAS, so no additional documentation is required. FIs can reach out to MAS for clarifications.</p> <p>(2) Minimum total three years' work experience in any of these job titles:</p> <ul style="list-style-type: none"> o Wealth planner (ultra-high/high net worth / family office / philanthropy). 	<p>MAS</p>

Green Economy					
4	Carbon project/program manager	<ul style="list-style-type: none"> • Carbon programme manager • Carbon project originator • Carbon project manager 	<ul style="list-style-type: none"> • Combine technical and project management skills to develop carbon projects, ensure that they are successfully registered, and can issue carbon credits under the requirements of relevant crediting mechanisms. • Other work related to: <ul style="list-style-type: none"> o International regulations for carbon markets (e.g. Kyoto Protocol, Paris Agreement). o Application of carbon offset project standards and frameworks. o Technology-based and nature-based solutions for carbon credit. o Project development in the Asian/Southeast Asian context. 	<p>Candidates should meet both criteria (1) and (2):</p> <p>(1) Be from a firm involved in the Carbon Services space. MOM verifies this directly with EDB and EnterpriseSG, so no additional documentation is required. New entrants to the Carbon Services space can reach out to EDB/EnterpriseSG.</p> <p>(2) Either (2a) or (2b):</p> <p>(2a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Earth Sciences o Environmental Engineering o Environmental Management o Environmental Policy o Sustainability Management o Sustainability Policy <p>(2b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Carbon auditor o Carbon programme manager o Carbon project manager o Carbon project originator o Carbon rating analyst o Carbon standards & methodology developer o Carbon verification & audit specialist o Chief sustainability officer o Conservation officer o Conservation scientist o Energy and sustainability manager o Environmental auditor o Environmental compliance officer o Environmental impact analyst o Environmental management consultant o Environmental officer 	EDB

				(environmental protection) <ul style="list-style-type: none"> o Environmental programme coordinator o Natural resource analyst o Sustainability officer o Sustainability specialist 	
5	Carbon standards and methodology analyst	<ul style="list-style-type: none"> • Carbon rating analyst • Carbon standards & methodology developer 	<ul style="list-style-type: none"> • Develop appropriate frameworks that can be used to credibly assess carbon projects. Examples of standards include those published by international organisations such as The Gold Standard and Verified Carbon Standard, which cover a broad range of carbon offset projects from nature-based solutions (e.g. mangrove planting, afforestation, deforestation prevention) to technology solutions (e.g. renewable energy, biogas, high-efficiency cookstoves). • Create robust templates and procedures for project developers to follow in order for the project to issue carbon credits. • Update rules and procedures as climate issues evolve. • Other work related to: <ul style="list-style-type: none"> o International regulations for carbon markets (e.g. Kyoto Protocol, Paris Agreement) o Technology-based and nature-based solutions for carbon credits o Application of carbon 	Candidates should meet both criteria (1) and (2): <ul style="list-style-type: none"> (1) Be from a firm involved in the Carbon Services space. MOM verifies this directly with EDB and EnterpriseSG, so no additional documentation is required. New entrants to the Carbon Services space can reach out to EDB/EnterpriseSG. (2) Either (2a) or (2b): <ul style="list-style-type: none"> (2a) At least a Bachelor's degree in any of these faculties: <ul style="list-style-type: none"> o Earth Sciences o Environmental Engineering o Environmental Management o Environmental Policy o Sustainability Management o Sustainability Policy (2b) Minimum total three years' work experience in at least one of these job titles: <ul style="list-style-type: none"> o Carbon auditor o Carbon programme manager o Carbon project manager o Carbon project originator o Carbon rating analyst o Carbon standards & methodology developer o Carbon verification & audit specialist o Chief sustainability officer o Conservation officer o Conservation scientist o Energy and sustainability manager o Environmental auditor o Environmental compliance 	EDB

			<p>offset project standards and frameworks</p> <ul style="list-style-type: none"> o Project development in the Asian/Southeast Asian context 	<p>officer</p> <ul style="list-style-type: none"> o Environmental impact analyst o Environmental management consultant o Environmental officer (environmental protection) o Environmental programme coordinator o Natural resource analyst o Sustainability officer o Sustainability specialist 	
6	Carbon trader	<ul style="list-style-type: none"> • Carbon trader 	<ul style="list-style-type: none"> • Trade/ broker carbon credits. • Originate and structure carbon credit deals. • Facilitate transactions between buyers and sellers of carbon credits. • Perform carbon market research and analysis on: <ul style="list-style-type: none"> o Different types of carbon credits and their attributes (e.g. project type, region, co-benefits, crediting mechanism). o Quality of carbon credits (e.g. Core Carbon Principles and Assessment Framework). o Factors that affect price dynamics in over-the-counter markets or exchanges. o International regulations and policies regarding carbon markets (e.g. Paris Agreement Article 6), as well as global and national compliance schemes and its evolving regulations 	<p>Candidates must minimally meet both criteria (1) and (2):</p> <p>(1) Minimum total three years' work experience in carbon markets or carbon credit-related fields.</p> <p>(2) At least a degree-equivalent qualification (i.e. score 10 points on COMPASS Criterion 2).</p> <p>EnterpriseSG will assess all applications that meet these criteria and may contact employers for a business profile, including details on their carbon trading business.</p>	Enterprise SG

			(e.g. Australia, China, European Union Emissions Trading System).		
7	Carbon verification and audit specialist	<ul style="list-style-type: none"> • Carbon auditor • Carbon verification & audit specialist 	<ul style="list-style-type: none"> • Assess whether carbon project issuing carbon credits meet the regulatory requirements. • Undertake field visits, or deploy technological solutions such as geospatial imaging/satellite data that determine whether the data reported by project developers correspond to actual emission reductions. • Apply international and local regulations relating to greenhouse gas emissions. • Use impact indicators for measurement and reporting purposes. • Apply knowledge of climate governance issues. • Use specific technologies (e.g. Geographic Information System data, sensors) used to verify emissions data submitted by project developers. 	<p>Candidates should meet both criteria:</p> <p>(1) Be from a firm involved in the Carbon Services space. MOM verifies this directly with EDB and EnterpriseSG, so no additional documentation is required. New entrants to the Carbon Services space can reach out to EDB/EnterpriseSG.</p> <p>(2) Either (2a) or (2b):</p> <p>(2a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Earth Sciences o Environmental Engineering o Environmental Management o Environmental Policy o Sustainability Management o Sustainability Policy <p>(2b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Carbon auditor o Carbon programme manager o Carbon project manager o Carbon project originator o Carbon rating analyst o Carbon standards & methodology developer o Carbon verification & audit specialist o Chief sustainability officer o Conservation officer o Conservation scientist o Energy and sustainability manager o Environmental auditor o Environmental compliance officer o Environmental impact analyst 	EDB

				<ul style="list-style-type: none"> o Environmental management consultant o Environmental officer (environmental protection) o Environmental programme coordinator o Natural resource analyst o Sustainability officer o Sustainability specialist 	
Healthcare					
8	Clinical psychologist	<ul style="list-style-type: none"> • Clinical psychologist 	<ul style="list-style-type: none"> • Assess mental health and social needs, formulate care and deliver a range of psychological therapies including Cognitive Behavioural Therapy across the age range and across hospital and community settings. • More details on the job duties can be found on the Ministry of Health's (MOH) Care to Go Beyond website: https://www.caretogobeyond.sg/ahp/highlights/care-gallery/webisodes/clinical-psychologist 	Candidates should have at least a Master's degree in Clinical Psychology. MOH will assess all applications and may contact employers for more information.	Ministry of Health (MOH)
9	Diagnostic radiographer	<ul style="list-style-type: none"> • Diagnostic radiographer • Magnetic resonance imaging technologist • Mammographer • Medical diagnostic radiographer • Radiologic technologist 	<ul style="list-style-type: none"> • Plan, prepare and perform diagnostic imaging examinations and post processing, with a wide range of equipment and techniques using X-rays, strong magnetic fields or Magnetic Resonance Imaging (MRI) and high frequency sound (ultrasound). • More details on the job duties can be found on AHPC's website: 	Candidates should be registered with MOH's Allied Health Professional Council.	MOH

			<ul style="list-style-type: none"> • https://www.healthprofessionals.gov.sg/ahpc/about-the-professions/diagnostic-radiography 		
10	Occupational therapist	<ul style="list-style-type: none"> • Ergotherapist • Occupational therapist • Occupational therapist manager • Occupational therapist researcher 	<ul style="list-style-type: none"> • Help individuals with physical, cognitive, developmental, social or emotional conditions to improve their basic functions and abilities, so they can reintegrate with society, and return to work, school, or daily life. • More details on the job duties can be found on AHPC's website: <ul style="list-style-type: none"> • https://www.healthprofessionals.gov.sg/ahpc/about-the-professions/occupational-therapy 	Candidates should be registered with MOH's Allied Health Professional Council.	MOH
11	Physiotherapist	<ul style="list-style-type: none"> • Aquatic physiotherapist • Clinical physiotherapist • Physical therapist • Physiotherapist • Physiotherapist manager • Physiotherapist researcher • Sports physiotherapist • Sports physical therapist 	<ul style="list-style-type: none"> • Assess, plan and implement rehabilitative programmes that improve or restore human motor functions, maximise movement ability, relieve pain syndromes, and treat or prevent physical challenges associated with injuries, diseases and other impairments • Apply a broad range of physical therapies and techniques such as exercises, manual techniques, electrical physical agents, technology, aids and appliances and other techniques. • More details on the job duties can be found on Allied Health Professional Council 	Candidates should be registered with MOH's Allied Health Professional Council.	MOH

			website: https://www.healthprofessionals.gov.sg/ahpc/about-the-professions/physiotherapy		
12	Registered nurse	<ul style="list-style-type: none"> • Assistant director of nursing • Assistant nurse clinician • Chief nurse • Clinic nurse • Clinical nurse • Deputy director of nursing • Director of nursing • Emergency nurse • Industrial nurse • Maternity nurse • Nurse anaesthetist • Nurse clinician • Nurse educator • Nurse manager • Nurse midwife • Matron (nursing) • Obstetrics nurse • Occupational health nurse • Orthopaedic nurse • Paediatric nurse • Perioperative 	<ul style="list-style-type: none"> • Use evidence-based nursing knowledge and professional nursing judgement to assess health needs, provide nursing care, educate clients and support individuals to manage their health holistically. • Practice in collaboration with other healthcare professionals and may practise in a variety of clinical contexts depending on their education preparation and practice experience. • More details on the job duties can be found on the Singapore Nursing Board website: https://www.healthprofessionals.gov.sg/snb/guidelines-and-standards 	Candidates should be registered with MOH's Singapore Nursing Board.	MOH

		nurse • Professional nurse • Psychiatric nurse • Public health nurse • Registered nurse • School nurse • Sister (nursing) • Staff nurse			
Infocomm Technology					
13	Artificial intelligence (AI) scientist/engineer	<ul style="list-style-type: none"> • AI engineer 	<ul style="list-style-type: none"> • Support the production of scalable and optimised AI/machine learning (ML) models • Focus on building algorithms for the extraction, transformation and loading of large volumes of real-time, unstructured data to deploy AI/ML solutions from theoretical data science models. • Run experiments to test the performance of deployed models, and identifies and resolves bugs that arise in the process. • Work in a team setting and apply knowledge in statistics, scripting and programming languages required by the firm. • Work with the relevant software platforms in which the models are deployed. 	Candidates should have either (1a) or (1b): (1a) At least a Bachelor's degree in any of these faculties: <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) (1b) Minimum total three years' work experience in at least one of these job titles: <ul style="list-style-type: none"> o AI engineer 	Infocomm Media Development Authority (IMDA)

		<ul style="list-style-type: none"> • AI researcher/scientist 	<ul style="list-style-type: none"> • Plan and lead the development of new and advanced data analytic techniques, methodologies and analytical solutions from design, prototyping, and testing. • Identify and develop core data and AI science components for the delivery of projects, architect specialised database and computing environments, explore and visualise complex data set to provide incremental business value. • Extract and integrate data from various sources, and create advanced models and algorithms suitable for the business use case. • Conduct testing on data and AI models, interprets findings from testing, and evaluates model performance for scaling and deployment. • Work in a team setting and apply proficient in statistics, scripting and programming languages required by the firm. • Work with relevant software platforms on which the solution is deployed. 	Candidates should have either (1a) or (1b): (1a) At least a Bachelor's degree in any of these faculties: <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) (1b) Minimum total three years' work experience in at least one of these job titles: <ul style="list-style-type: none"> o AI researcher/scientist 	IMDA
14	Applications/ systems programmer	<ul style="list-style-type: none"> • Analyst programmer • Applications programmer • Computer 	<ul style="list-style-type: none"> • Write and maintain programmable code outlined in technical instructions and specifications for 	Candidates should have either (1a) or (1b): (1a) At least a Bachelor's degree in any of these faculties:	IMDA

		<ul style="list-style-type: none"> programmer • Multimedia programmer • Systems programmer • Technical programmer 	software applications and operating systems.	<ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Analyst programmer o Applications programmer o Computer programmer o Multimedia programmer o Systems programmer o Technical programmer 	
15	Cloud Specialist	<ul style="list-style-type: none"> • Cloud architect • Cloud engineer • Cloud operations engineer • Cloud specialist 	<ul style="list-style-type: none"> • Deploy and configure solutions in the cloud. • Automate cloud operations, develop infrastructure automation scripts and participates in the continuous improvement of cloud solutions. • Participate in the specification, setup and run Proof of Concepts and demonstrations of cloud solutions. • Administer and maintain servers across virtual platforms. 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Cloud architect o Cloud engineer o Cloud operations engineer o Cloud specialist 	IMDA
16	Cyber risk specialist	<ul style="list-style-type: none"> Cyber compliance specialist • Cyber governance specialist • Cyber risk analyst • Cyber risk manager • Cyber threat monitoring analyst • Cyber security 	<ul style="list-style-type: none"> • Conduct cyber risk assessment in support of technology initiatives to help identify IT related risk and determine appropriate controls to mitigate risks. • Monitor, track, and manage risk mitigations and exceptions and ensure adequate monitoring capability is incorporated into solutions. 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Cyber compliance 	IMDA

		<ul style="list-style-type: none"> consultant • ICT resilience analyst • ICT resilience manager • ICT security consultant • ICT security specialist • Information security analyst • Information technology security specialist 		<ul style="list-style-type: none"> specialist o Cyber governance specialist o Cyber risk analyst o Cyber risk manager o Cyber threat monitoring analyst o Cyber security consultant o ICT resilience analyst o ICT resilience manager o ICT security consultant o ICT security specialist o Information security analyst o Information technology security specialist 	
17	Cybersecurity architect	<ul style="list-style-type: none"> • Cybersecurity architect • Cybersecurity engineer • ICT security engineer • ICT security architect • Information systems security developer 	<ul style="list-style-type: none"> • Design, develop, and implement secure system architectures. • Embed security principles into the design of system architectures to mitigate the risks posed by new technologies and business practices. • Design artefacts, spanning design, development, and implementation, into enterprise systems that describe security principles and how they relate to the overall enterprise system architecture. • Perform routine activities related to the periodic review and audit activities of infrastructure security systems and maintains documentation of security standards and procedures. 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Cybersecurity architect o Cybersecurity engineer o ICT security engineer o ICT security architect o Information systems security developer 	IMDA
18	Cybersecurity	<ul style="list-style-type: none"> • Cyber 	<ul style="list-style-type: none"> • Perform real-time 	Candidates should have	IMDA

	<p>ty operations specialist</p>	<p>defense incident responder</p> <ul style="list-style-type: none"> • Cyber incident responder • ICT security operations analyst • ICT threat monitoring analyst 	<p>analysis and trending of security log data from various security devices and systems.</p> <ul style="list-style-type: none"> • Maintain data sources feeding the log monitoring system, develop and maintain detection and alerting rules. • Respond to user incident reports and evaluates the type and severity of security events. • Execute initial triage of incidents to rule out false positives. • Identify recurring security issues and risks and develops mitigation plans and recommends process improvements. • Interpret and apply security policies and procedures. • Establish escalation processes for security incidents and develops contingency plans and disaster recovery procedures. 	<p>either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Cyber defense incident responder o Cyber incident responder o ICT security operations analyst o ICT threat monitoring analyst 	
19	Data Scientist	<ul style="list-style-type: none"> • Chief data scientist • Data engineer • Data scientist • Head of data analytics 	<ul style="list-style-type: none"> • Develop and implement techniques and analytics applications to transform raw data into meaningful information using data-oriented programming languages and visualisation software. • Apply data mining, data modelling, natural language processing, and machine learning to extract and analyse information from large 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Chief data scientist o Data engineer 	IMDA

			<p>structured and unstructured datasets.</p> <ul style="list-style-type: none"> • Visualise, interpret, and report data findings and may create dynamic data reports as well. 	<ul style="list-style-type: none"> o Data scientist o Head of data analytics 	
20	Digital forensics specialist	<ul style="list-style-type: none"> • Computer forensics expert • Computer forensics investigator • Cyber forensics expert • Cyber forensics investigation specialist • Cyber incident investigation specialist • Cyber threat investigation specialist • Digital forensic expert • Digital forensics analyst • ICT forensics expert • Information forensics expert 	<ul style="list-style-type: none"> • Conduct complex post-incident forensic analysis to investigate causes of intrusion, attack, loss, or breach occurring in an organisation. • Identify and define forensic issues and root causes. • Develop reports that detail incident timeline, evidence, findings, conclusions and recommendations. • Support the design of a breach notification process after a security incident to minimise damage and downtime when attacks and exploits occur. • Select, test, and deploy security products and collect information about Internet-based criminal activities. • Recommend corrective actions to prevent and mitigate internal control failures. 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Computer forensics expert o Computer forensics investigator o Cyber forensics expert o Cyber forensics investigation specialist o Cyber incident investigation specialist o Cyber threat investigation specialist o Digital forensic expert o Digital forensics analyst o ICT forensics expert o Information forensics expert 	IMDA
21	Penetration testing specialist	<ul style="list-style-type: none"> • Ethical hacker • Exploitation analyst • ICT security tester • Network security tester • Penetration 	<ul style="list-style-type: none"> • Design and perform tests and check cases to determine if infrastructure components, systems and applications meet confidentiality, integrity, authentication, availability, 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis 	IMDA

		<p>testing specialist</p> <ul style="list-style-type: none"> • Security penetration tester • Security penetration testing manager • System security tester • Vulnerability analyst 	<p>authorisation, and non-repudiation standards.</p> <ul style="list-style-type: none"> • Translate requirements into test plan, write and execute test scripts or codes in line with standards and procedures to determine vulnerability to attacks. • Certify infrastructure components, systems and applications that meet security standards. 	<ul style="list-style-type: none"> o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Ethical hacker o Exploitation analyst o ICT security tester o Network security tester o Penetration testing specialist o Security penetration tester o Security penetration testing manager o System security tester o Vulnerability analyst 	
22	Product manager (digital)	<ul style="list-style-type: none"> • Digital product manager 	<ul style="list-style-type: none"> • Manage the entire product line life cycle, from strategic planning to tactical activities. • Support product positioning and customer demand, and guide product development from conception to launch. • Evaluate product functionalities and performance and propose enhancements to products based on market feedback. • Research and analyse potential partner relationships for the product and generate ideas to grow market share, improve customer experience and drive growth. • Drive market research studies to explore new technology and oversee development of business proposals for new opportunities. 	<p>Candidates should have either (1a) or (1b):</p> <p>(1a) At least a Bachelor's degree in any of these faculties:</p> <ul style="list-style-type: none"> o Computer Science o Information Technology o Programming & Systems Analysis o Science (Computer Studies) <p>(1b) Minimum total three years' work experience in at least one of these job titles:</p> <ul style="list-style-type: none"> o Digital product manager.
